

VS

Feature	Octagonal Seasoning Machine	Rotary Drum Seasoning Machine
Structure	Octagonal mixing drum, vertical design	Cylindrical drum, horizontal design
Best For	Small-batch, multi-variety seasoning (nuts, candies, snacks)	Large-batch, continuous production (potato chips, puffed snacks, pet food)
Mixing Effect	Uniform stirring, ideal for granular & block materials	360° tumbling, perfect for sheet & strip materials
Capacity	Medium-low capacity, batch operation	High capacity, continuous production line integration
Footprint	Compact, easy to move	Larger footprint, suitable for fixed production lines
Key Advantage	Flexible, easy to clean, ideal for small-scale production	Efficient, consistent coating, ideal for industrial-scale snack lines
