Quotation of Hydraulic Wood Sawdust Briquette Machine

Product Description

This High-end Briquetting Presses Equipment is a professional Wood Working Machine (woodworking Briquetting Machine) designed for converting loose biomass materials into dense fuel briquettes. As a core Briquetting Press Equipment Machine, it' s widely recognized as Sawdust wood Sawdust Briquetting Machines, Fuel Briquette Press Machine and Biomass Hydraulic Briquette Press Briquetting Machine.

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

Product Technical Information

Model	Output	Voltage	Power	Dimensions	Weight	EXW EXW price(USD)
Rx-60	100-150kg/h	400V,50hz	7.5KW+1.5KW+0.75KW	1620*1260*1360mm	800kg	\$ 5719

Raw material

1. Wood-based raw materials: wood chips, sawdust, wood scraps, branches, bark, bamboo shavings, and other wood processing offcuts;
2. Agricultural raw materials: straw (corn, wheat, rice), rice husks, peanut shells, cottonseed husks, coconut shells, and other agricultural waste;
3. Other biomass: palm fiber, sugarcane bagasse, mushroom residue, and other plant-based waste.

Wood chips

Sawdust

Wood chips

Branches

Bark

bamboo shavings

Corn stalks

Rice husk

Peanut shells

Coconut shell

Product Application

1. **Domestic Use:** Fuel for household stoves and fireplaces (alternative to coal/charcoal), and cooking energy for kitchen stoves.
2. **Commercial Services:** Fuel for restaurant kitchens, and heating systems for guesthouses/small hotels.
3. **Industrial Production:** Boiler fuel for small and medium-sized factories (e.g., steam supply for food processing and wood drying), and raw materials for small-scale biomass power plants.
4. **Agricultural Support:** Fuel for heating equipment in livestock farms, and energy for self-use after waste treatment at

Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.

Working Principle

The Hydraulic Wood Sawdust Briquette Machine (Hydraulic Briquetting Machine) uses hydraulic pressure to compress raw materials:

- 1.Raw materials are fed into the hopper (via agitator motor).
- 2.The Hydraulic Briquette Press Machine applies high pressure to compact materials into 60mm Briquetting Press shapes.
- 3.Dense briquettes are discharged automatically, ready for use or storage.

Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.

Product Packaging & Shipping

1. Packaging

In order to ensure the safety of the product during transportation, we have adopted strict packaging measures. The main body of the equipment will be fully wrapped with high-strength plastic film to prevent erosion by dust, moisture, etc. during transportation, and to avoid damage due to collision during transportation.

In terms of overall packaging, the equipment will be loaded into a customized wooden box. The wooden box has a sturdy structure and is equipped with a special fixing device inside, which can firmly fix the equipment and prevent the equipment from shaking in the wooden box. At the same time, the name, model, weight, transportation precautions and other information of the equipment will be clearly marked on the wooden box, which is convenient for transportation and handling personnel to identify and operate.

2. Transportation

For international customers, sea transportation is mainly used. Before loading, the equipment will be strictly inspected and reinforced to ensure that the equipment is not damaged during long-term sea transportation. At the same time, we will cooperate with professional freight forwarding companies to handle relevant transportation procedures and insurance, and provide customers with one-stop transportation services, so that customers have no worries.

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

Company Introduction:

Zhengzhou Runxiang Machinery Equipment Co., Ltd. is an enterprise focusing on the research and development, production and sales of agricultural and food processing equipment. Over the years, it has been committed to providing customers with high-quality, high-performance equipment and perfect solutions. The company has a team of professional engineers, technicians and sales staff who have rich experience and expertise in their respective fields.

In terms of research and development, the company continues to invest a lot of resources, pays attention to the latest technology and market demand in the industry, and has established cooperative relations with many scientific research institutions and universities at home and abroad to jointly carry out technical research and product innovation. Through continuous efforts, the company has launched a series of advanced equipment with independent intellectual property rights, including this fully automatic dumping machine.

In the production process, the company strictly follows the international quality management system, from the procurement of raw materials to the assembly and testing of products, every link is strictly controlled to ensure the stable and reliable quality of the products. The company has a modern production base and advanced production equipment, which can meet the customized needs of different customers for equipment.

COMPANY INTRODUCTION

Quality, price, time and service is the tenet of our business.

How about after sales service:

After-sales service policy

1. After receiving payment from customers, sales should reconfirm the basic requirements of the machine configuration, voltage hertz, accessories and other basic requirements as soon as possible, and then send a purchase order to the workshop as soon as possible in order to save time of customers.
2. Make sure to keep the pictures before and after the packaging before shipping, and reconfirm whether the shipping list is consistent with the purchase order and the customer's needs.
3. After receiving the bill of lading, prepare the packing list and invoice for customs clearance and other customs clearance documents that the customer may need as soon as possible.
4. Every one week, two weeks and or one month (determined by the voyage), follow up the freight forwarder to check the latest route of the customer's cargo and inform the customer about the newest arrival time.
5. Please remind customers to bring customs clearance information to the freight forwarder to prepare for customs clearance ten days before the arrival of the goods.
6. Please contact customers in time to follow up the latest progress of customs clearance and transportation, remind customers to check whether the packaging is in good condition, and protect the packaging during transportation to avoid damage to the machine.
7. Must contact customers to guide the wire connection, using and precautions before and during operation.
8. After sales follow up must be provided every month, and any after-sales problems are reported and resolved in time. If the after-sales problems are not resolved as required, according to the seriousness of the circumstances, sales will be warned, punished, and expelled in accordance with the company's rules and regulations.

9. If you have any other useful suggestion about our after sales service, welcome to contact us at susan@pelletmilling.com any useful suggestion will get extra \$100 from our company as gift, welcome everyone!

How to use the machine?

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.
